

**XRMOON**

**WHITEPAPER**

A new generation of meme tokens has arrived with XRP Ledger

## TO THE XRMOON!

The XRP army have had little to nothing to get excited about over the past years while hodling strong and being most faithful. What if there was a token that could pump your bags and bring some excitement to your crypto investing?

Introducing XRMOON. This ultimate meme token brings all the fun of a new community while being part of insane growth and gains to your investment portfolio. XRMOON token has been created to use as utility for a project with high ambition that is part of future technology.

## WHY A MEME TOKEN?

Meme tokens have become frowned upon in the crypto space recently and most are seen as a fad for short term investing. We understand the power of memes in today's society and what better way to build a large community than viral engagement with lots of banter while being part of a group of like minded peers. XRMOON will create a community where everyone can get involved and come together for the same mission.

## THE XRMOON MISSION

We believe that virtual worlds and NFTs will play a major role in the future of digital commerce and community, so we're getting in early. XRMOON has a clear vision to create a new virtual destination of the future for interacting with the community while having access to trade digital goods and services.

With access to the lowest fees and fastest transaction network in the world, we have a significant advantage over competitor platforms. Our job is to build the best product then let the world know about it!

### XRMOON Phase 1

The first phase of the project is to develop a futuristic marketplace for digital goods, products and services. The rise of Nfts has lead to extraordinary growth in the trading of digital assets which stems from more than just digital artwork but has the potential to become a fully virtual economy. Our platform will open access to a new world of digital commerce, enable creators to create new brands, products and services and sell them on the marketplace. Anything from digital artwork to virtual fashion, vehicles and real estate and everything in between. A new way of asset ownership which can be utilized in the virtual world.

### XRMOON Phase 2

#### Colony-X Virtual World

Imagine a break away society that constructs a large colony on the moon. We will develop a futuristic city landscape, a new virtual moon colony gaming experience for the crypto community to interact, meet and access the virtual economy.

We will integrate the marketplace into this platform. Think decentraland meets cyber punk with a fully operating virtual economy, where the community can buy, sell and trade digital goods. Start a business, invest or just have fun exploring the colony and meeting new people!

## RISE OF THE XRPL

The team chose the XRP Ledger to create the project specifically for the supreme power of the network. With instant payments and little to no fees, our project will not only stand out from other platforms but also pioneer and showcase a new way for future startups on the XRP Ledger. A common nuisance experienced with rival networks is the high gas and processing fees. Problem solved with XRPL as no gas fees apply!

## TOKENOMICS

TOTAL SUPPLY  
Supply: 100Billion (fixed)

70%

Airdrop (3 Stages)

AIRDROP SCHEDULE

(Subject to change via announcement)

50% 5th December, 2021

50% 15th-25th December, 2021

20%

Development, Marketing , partnerships & team

10%

Reserved for bonus Airdrops, giveaways and charitable causes (To be decided by the community)

## XRMOON TEAM VISION

The creators are all members of the dedicated XRP community and we wanted to create a project that can help promote and grow the XRP brand globally. We assembled a world class development team with expertise in blockchain ecosystems, virtual economies and open world gaming platforms to execute the project. The vision is simple. Build a great product that users want to be part of and the success will follow.

## START WITH A BANG!

Community is the core focus of the project. To generate excitement, trust and loyal members we will be distributing over 70% of the total token supply to our community. That's over 70 Billion tokens out of 100 Billion total supply! This means our community will play a significant role in the growth and success of the project. We have plenty of Airdrops and Giveaways lined up for you.

## GIVING BACK

Giving back to society has been part of the discussion since the project idea was born. We want to support those in need and we will open a discussion with the community to decide which charities and/or foundations we can support to help change as many lives as possible for the better.

## 3..2..1....BLAST OFF!

We can't comprehend how exciting this project is for our team. To create a piece of the future while having investors along to be part of the success is a goal for us all. Starting at zero, we can skyrocket the value of the token offering while building a community and friendships that lasts a lifetime.

Calling all astronauts. Grab your spacesuits and join us on a mission to the XRMOON!
